6 star Hackerrank

SUMMARY

Currently Leading the Engineering Team @ Echor Tech.

- Architected scalable AWS backend solutions, managing end-to-end delivery.
- Launched crypto projects achieving ~\$20M market cap and thousands of active users.
- Optimized cloud infrastructure, reducing server costs while supporting tens of thousands of users.
- Successfully scaled platforms from zero to tens of thousands of active users.
- Implemented full DevOps workflows (CI/CD, Docker, IAAC) across AWS and other clouds.
- Managed complete migration from monolithic to microservices architecture.
- Established engineering processes, trained teams, and scaled engineering headcount by 10x.
- Led client technical discussions, consistently delivering beyond expectations.

SKILLS

AWS · React · Devops

Python · Node · Rust

Blockchain · Quant

SAI ARUN MUNAGANTI

SOLUTION ARCHITECT

6 + YOE (FULL STACK | DEVOPS | BLOCKCHAIN)

Echor Tech

Solution Architect

Hyderabad, India

09/2024 - Present

- Architecting scalable backend solutions on AWS—transforming client ideas into robust realities.
- Overseeing complete product lifecycles: from initial concept and development to deployment, monitoring, and ongoing optimization.
- Leading technical initiatives as the primary go-to expert across frontend, backend, mobile apps, databases, and DevOps.
- Heading all DevOps operations, ensuring smooth deployments and infrastructure efficiency & security.
- Leading technical discussions in client meetings, clearly addressing complex requirements and consistently delivering beyond expectations.

Echor Tech

Software Engineer 3

Hyderabad, India

01/2023 - 09/2024

- Built and managed landwey.in, scaling seamlessly to 30,000+ users and 1,000+ property listings with end-to-end backend and DevOps.
- Significantly optimized infrastructure for Landwey, achieving monthly server costs under \$30, while delivering multiple internal dashboards and maintaining effective client interactions.
- Successfully launched and scaled three high-impact crypto projects from scratch to thousands of active users, listed on platforms including OpenSea, MEXC, HTX exchanges, and popular decentralized exchanges (DEXs).
- Built, owned, and managed these crypto projects end-to-end, collectively achieving an estimated market cap of \$20M.

Echor Tech

Lead Developer

Hyderabad, India

12/2021 - 01/2023

- Led end-to-end development of a crypto trading automation platform featuring copy trading, priority execution, and complex referral systems.
- Built a media platform with crypto incentives and integrated machine learning, attracting interest from multiple VC firms.
- Architected scalable backend systems and streamlined DevOps for real-time apps involving payment gateways, location services, and queuing mechanisms.
- Established core tech workflows (Jira, GitHub), provided team training, and managed technical hiring—becoming the startup's go-to tech expert.
- Guided critical technical decisions, ensuring product excellence and timely delivery across multiple high-impact projects.

VOLUNTEERING

Swecha.org

Python Teacher

2018 - Present

Working as a Volunteer teacher for python

Open Source

Contributor

2018 - Present

contributed to open source projects and built several open source projects of my own.

COURSES

AWS Solution Architect Associate

Worked on AWS SAA-C03 certification course

6 + YOE (FULL STACK | DEVOPS | BLOCKCHAIN)

Grow Indigo Pvt. Ltd.

Software Development Engineer

Mumbai, India

04/2021 - 12/2021

-

- Complete revamp of admin dashboard from asp.net to react and .net core micro services
- Migrated all the services from on prem to AWS along with CI/CD setup and docker
- Completed security audit and implemented IAM micro service
- Implemented brand new referral and offers system
- Scaled the application to tens of thousands of users

GGK Tech

Software Engineer

Hyderabad, India

08/2020 - 04/2021

physioage.com

- Worked as a full stack developer using .net core, react, mysql and redis
- Worked on azure. CI/CD, deployments, serverless, multi environment setup
- Improved the application load times significantly (query optimisation, cache, serverless)

GGK Tech

Associate Software Engineer

Hyderabad, India

01/2019 - 08/2020

-

- fideliscare.org, pronto-delivery.com
- Worked as a full stack developer using .net core, react, oracle.
- Worked on a one of the largest migration projects. migrated complete db & several .net projects.
- Built and Owned an internal employee management system involving complex hierarchy having 10k+ users.

EDUCATION

JNTUH College of Engineering Hyderabad

Hyderabad, India

Bachelor's degree, Computer Science & Engineering

- Member of FOSS Club (swecha.org)
- Major Project: Handwritten Character Recognition System
