KEY ACHIEVEMENTS

Founding team member

Built core workflows and ops from scratch, owning and scaling projects with a combined market cap of multi-million dollars

SUMMARY

Currently Leading the Engineering Team @ Echor Tech.

- **AWS Expert.** Architected scalable Backend and cloud native solutions, managing end-to-end delivery.
- Launched crypto projects achieving ~\$50M market cap and thousands of active users.
- Optimised cloud infrastructure, reducing server costs while supporting tens of thousands of active users.
- Successfully scaled platforms from zero to tens of thousands of active users.
- Implemented full DevOps workflows (CI/CD, Docker, IAAC) across AWS and other clouds.
- Managed complete migration from monolithic to microservices architecture.
- Established engineering processes, trained teams, and scaled engineering headcount by 10x.
- Led stakeholder technical discussions, consistently delivering beyond expectations.

SAI ARUN MUNAGANTI

SOLUTIONS ARCHITECT

6+ YOE (FULL STACK | AWS | DEVOPS | BLOCKCHAIN)

Echor Tech

09/2024 - Present

Solution Architect

- **A Broad-Scoped Tech Generalist.** Architecting Scalable Backend Solutions on primarily on AWS and other cloud services.
- Building and Leading a VC backed Product disrupting a **\$4B industry** with a projected **200k** initial userbase
- Leading technical initiatives as the **primary go-to expert** across broad range of technologies - frontend, backend, mobile apps, databases, and DevOps.
- Heading all DevOps and Backend operations, ensuring smooth deployments and infrastructure efficiency, **security** and scalability.
- Leading technical discussions with stakeholders, clearly addressing complex requirements and consistently delivering beyond expectations.
- **Tech:** Kafka, Python, Nodejs, AWS, ECS, Fargate, FastApi, Cloudformation (IAAC), Docker, Linux, React, NestJS, New Relic

Echor Tech

01/2023 - 09/2024

Software Engineer 3

- Successfully built and scaled three **High-Impact crypto projects** from scratch to thousands of active users, listed on platforms including OpenSea, MEXC, HTX exchanges and popular decentralised exchanges (DEXs).
- Built, **owned** and managed these crypto projects end-to-end, collectively achieving an estimated market cap of **\$50 Million**.
- Built and owned landwey.in, scaling seamlessly to 30k+ users and thousands of listed properties and significantly optimised infrastructure achieving very low server costs and also delivering multiple internal dashboards.
- **Tech:** Solidity, Python, AWS, Node, Redis, NextJs, React, Rust, Github Actions, Linux, Dex, Docker, Web3, Svelte, Monitoring
- **AWS Tech:** Amplify, S3, Dynamodb, DocumentDb, Aurora, VPC, SQS, ECS, Auto Scaling, IAM, Cloudformation, RDS, CodeBuild, WAF, EC2, Lambda

Echor Tech

12/2021 - 01/2023

Lead Developer

- Led end-to-end development of a advanced crypto **trading automation** platform featuring copy trading, screener, realtime market tracking, backend, and complex referral systems.
- Built a multi-media platform with crypto incentives and integrated machine learning, attracting interest and getting offers from **multiple VC firms**.
- Architected scalable backend systems and streamlined DevOps for **real-time** apps involving payment gateways, location services, complex business logic.
- Established core tech workflows (Jira, GitHub) and **managed technical hiring and training** — becoming the startup's go-to tech expert.
- Guided critical technical decisions, ensuring product excellence and timely delivery across multiple high-impact projects.
- **Tech:** Rabbit MQ, Python, Flask, Node, Express, Mongodb, Postgres, Linux, Docker, Cloud Native, Serverless, Lambda, AWS, React, Solidity, Web3

COURSES

AWS Solution Architect Certification

Worked on AWS SAA-C03 certification

VOLUNTEERING

Swecha.org

Python Teacher

2018 - Present

Working as a Volunteer teacher for python

Open Source

Contributor

2018 - Present

contributed to open source projects and built several open source projects of my own.

SKILLS

Python · Node · Rust · C#

AWS · Devops · React

Blockchain · Quant · LLM

6+ YOE (FULL STACK | AWS | DEVOPS | BLOCKCHAIN)

Grow Indigo Pvt. Ltd.

04/2021 - 12/2021

Software Development Engineer

growindigo.co.in

- Complete revamp of internal dashboards from asp.net to react and .net core micro services
- Migrated all the services from on-prem to AWS along with CI/CD setup involving several microservices(10+) with minimal downtime.
- Identified and Fixed **critical security vulnerabilities** and implemented proper IAM service for all the microservices
- Built and **Owned** a referral and offers micro service
- Scaled the application to tens of thousands of users
- **Tech:** .Net core, C#, AWS, MongoDB, Mysql, Microservices, Security, Python, TypeScript, React

GGK Tech

08/2020 - 04/2021

Software Engineer

physioage.com

- Worked as a full stack developer using .net core, react, mysql and redis
- Worked on azure. CI/CD, deployments, serverless, multi environment setup
- Improved the application load times significantly (query optimisation & cache) handling **100k+ users**
- **Tech:** C#, Azure, Serverless, .Net Core, React, Mysql, Redis, Azure Service Bus, Unit tests, Python, SQL Server

GGK Tech

01/2019 - 08/2020

Associate Software Engineer

fideliscare.org, pronto-delivery.com

- Worked as a full stack developer using .net core, react, oracle.
- Worked on a one of the largest migration projects. migrated complete db & several .net projects.
- Built and **Owned** an internal employee management system involving complex hierarchy having 10k+ users.
- **Tech:** React, C#, .Net, Oracle, Sybase, Python

EDUCATION

JNTUH College of Engineering Hyderabad

Bachelor's degree, Computer Science & Engineering

- Member of FOSS Club (swecha.org)
- Major Project: Handwritten Character Recognition System (KNN, Python)
